EDUCATIONAL GOALS AND EXPECTED LEARNING OUTCOMES

The main course objective is the acquisition of the language competence for specific purposes that is required when carrying out projects or working in the field of Architecture & Design.

In details, the course aims to:

⇒ Enhance students’ knowledge of phonology, grammar & lexis
⇒ Develop receptive (Reading/Listening) and productive (Speaking/Writing) language skills in a variety of communicative contexts
⇒ Consolidate students’ competence in using the language in oral & written interactions
⇒ Develop transferable life-long skills (e.g. teamwork, problem-solving & cultural awareness) and study skills (researching, searching for information, synthesising source texts, referencing) through simulations, role-plays and meaningful tasks relating to Architecture & Design

By the end of course, students will demonstrate:

o **Knowledge and Understanding**: the ability to understand the gist and the specific information contained in oral & written texts used in a variety of communicative contexts

o **Applying Knowledge and Understanding**: the ability to interact with those texts autonomously and to respond to the inputs provided accurately and effectively

o **Making judgements**: the ability to carry out further study or research and apply new knowledge to real-life communicative situations which lead to real outcomes

o **Communication**: the ability to communicate accurately and effectively while taking on a variety of roles in various situations

o **Learning skills**: students will have acquired transferable long-life skills and will have developed their own learning strategies for their continuous personal & professional growth

PRE-REQUIREMENTS

Students must have a **CEF B1/B1+** level. It is assumed that students have studied English before and have had a consistent exposure to English-only lessons or authentic English texts. Students must be familiar with the most common language items & functions from the B1 level. Please, see the Core Inventory B1 below (British Council-Eaquals, 2010).

SYLLABUS

The language items and functions will be selected from the British Council-Eaquals Core Inventory for B2 level (2010), as shown below, following an Entry level test and a Needs Analysis Questionnaire that will be administered at the outset. A selection of the most challenging language items & functions from the B1 level (see below) will also be practiced for mastery.

**Course overview**

Each lessons will aim to revise and consolidate previous knowledge while developing receptive & productive language skills and to introduce new language items or functions through a realistic and meaningful language use in role-plays, pair- and groupwork, peer interviews, simulations and practical tasks. During the course, students will have plenty of opportunities to consolidate their language knowledge and to practise Listening & Speaking skills. The course will also have a consistent Pronunciation focus and a section on English for Architecture & Design. Attendance is highly
recommended. Individual coursework, e.g. reading or writing tasks, will be set for self-study. The teacher will monitor and provide timely and constructive feedback on students’ progress and performance both in class and at a distance.

### TEACHING METHODS

The Communicative Language Teaching method (CLT) will be used as well as a lexical and task-based approach. This will enable students to enhance their language acquisition through authentic language use in real-life tasks and simulations in class. Attendance is therefore highly recommended.
